

the majority-minority opposition, but also intra-group differences. Such intra-group differences have been outlined in our study. Initially, the analysis showed that the surveyed Bulgarian Turks, who perceived themselves as having high-income, demonstrated distances towards Russians at the same time. The subsequent moderation analyses specified that Bulgarian Turkish respondents, who revealed authoritarian attitudes and high income, kept short distances to Russian immigrants. That is to say, the internal differentiation of the respondents according to their characteristics and in combination with the overall group propensity can change the nature of intergroup attitudes and relations to other ethnic groups.
