

Общо има повече фактори, предсказващи субективно благополучие, при хората с доминиращо взаимозависимо конструиране, отколкото при тези с доминиращо независимо. Тази по-голяма сложност може допълнително да обяснява защо хората с взаимозависимо конструиране докладват по-малко щастие, отколкото тези с независимо (Паунова-Маркова 2017).
